

## SH-06 HEADSET

A rugged headset designed for two-way radio communications catering to industrial, police, community service and warehouse applications in highly active environments.

An adjustable boom mic permits precise placement near the lips and stays in place during physical activity.

Fitted with a high-quality microphone, it allows the user to communicate even in high noise environments and still transmits as intelligible message across to the recipient or to a voice input device.

Frequency response measured at 1/4"

### Features:
